RESEARCH INTERESTS

Mechanism Design, Linkage Synthesis, Soft Robotics, Computational Co-design, Reinforcement Learning

EDUCATION

PhD Candidate, Systems Engineering
Arizona State University, Mesa, AZ
Advisor: Professor Daniel M. Aukes

January 2021 – Present (Graduating 2025)

Master of Science, Robotics Engineering
Worcester Polytechnic Institute, Worcester, MA

August 2016 - December 2017

Bachelor of Science, Robotics Engineering
Worcester Polytechnic Institute, Worcester, MA

August 2012 - May 2016

RESEARCH EXPERIENCE

Graduate Research Assistant, IDEA Lab, Arizona State University, Mesa, AZ January 2021 - Present

- Built a reinforcement learning framework for control and design tuning of a quadruped robot.
- Designed and built an accessible, dynamic quadruped robot with tunable, compliant legs for research and education.
- Studied stiffness tuning of a robot leg made from folded multi-layer, multi-material laminates through design optimization, modeling, and experimentation.

Research Assistant, Soft Robotics Lab, Worcester Polytechnic Institute, Worcester, MA May 2013 - May 2016

- Developed a systematic and modular origami-inspired robot fabrication method that cuts and folds single-layer plastic sheets into various legged and aerial robots.
- Designed and fabricated modular and reliable soft pneumatic actuators with integrated sensors for a soft snake robot.

PROFESSIONAL EXPERIENCE

Robotics Internship, Robotics and AI Institute, Cambridge, MA June 2024 - September 2024

- Explored, designed, built, and evaluated various hydraulic transmission systems for robotics applications.
- Constructed a testing platform to collect displacement and force data for detailed characterization.

Cofounder, Orimagi, Inc., Boston, MA December 2017 - December 2020

- Commercialized my origami-inspired robots research into an educational robot toy product and sold over a thousand of them to families and schools.
- Developed all technical aspects of the product, including all the mechanical parts, PCBs, firmware, smartphone apps, and packaging.
- Contacted and worked with manufacturers to mass produce and certify the product.
- Involved closely in product iterations, playtesting, events, and sales.

PRESENTATIONS

- Informed Repurposing of Quadruped Legs for New Tasks, IEEE International Conference on Robotics and Automation (ICRA), May 2025
- Steerable Walking with Vibrating Soft Twisted Beams, Democratization Workshop, IEEE-RAS International Conference on Soft Robotics (RoboSoft), April 2024
- Development of A Dynamic Quadruped with Tunable, Compliant Legs, IEEE/RSJ International Conference on Intelligent Robots and Systems (IROS), October 2023
- Direct Encoding of Tunable Stiffness Into an Origami-Inspired Jumping Robot Leg, ASME International Design Engineering Technical Conferences & Computers and Information in Engineering Conference (IDETC-CIE), August 2023
- Design, fabrication, experimental analysis, and test flight of an origami-based fixed-wing aerial vehicle: μ Plane, ASME International Design Engineering Technical Conferences and Computers and Information in Engineering Conference (IDETC-CIE), August 2016

PATENT

- D. Aukes and F. Chen, “Systems and methods for a dynamic quadruped with tunable, compliant legs,” US Patent App. 18/766,467, Jan. 9, 2025
- D. Aukes, Y. Jiang, and F. Chen, “Tunable motion using flexible twisted beams,” US Patent App. 18/674,101, Nov. 28, 2024
- C. D. Onal, F. Chen, and W. Tao, “Fabrication of robotic mechanisms and systems from planar substrates,” US Patent 10,478,975, Nov. 19, 2019

AWARDS

- Best Paper Award Finalist, IEEE International Conference on Robotics and Automation (ICRA), Informed Repurposing of Quadruped Legs for New Tasks, 2025
- First Place in IEEE Robotics and Automation Society Soft Material Robot Challenge (SMRC) Soft Robot

Speed Challenge, IEEE International Conference on Robotics and Automation (ICRA), 2017

- Worcester Polytechnic Institute Summer Undergraduate Research Fellowships, 2014
